

## Palmetto Plus<sup>™</sup> • <sup>™</sup>

# Science-based supplement for men that supports long-term

ITEM #128

Saw Palmetto

Saw palmetto has a long history of use in helping retain a healthy prostate. Considerable clinical research has shown that about 80 to 90 percent of men using saw palmetto show a positive correlation between saw palmetto and prostate health.\*

### Lycopene and Soy Isoflavones

Palmetto Plus is a combination of saw palmetto, lycopene, and soy isoflavones, which have been shown to assist in retaining prostate health.\*

Lycopene is the most abundant carotenoid (vitamin-like compound) found in the prostate and may play a role in supporting a healthy prostate by enhancing immune function and providing antioxidant protection. Soy isoflavones, a group of phytochemicals found in soybeans, have been shown to help maintain health functions throughout the body.\*

#### Why Palmetto Plus™?

USANA is one of only a few major manufacturers to combine saw palmetto with lycopene and soy isoflavones in a single product. Palmetto Plus is a convenient, effective way to obtain a comprehensive men's health formulation at a reasonable price.\*
